

**SECRET**

14 April 1971

Mr. George F. Murphy  
Deputy Director  
Joint Committee on Atomic Energy  
Congress of the United States  
Washington, D. C.

Dear George:

I understand that when Senator Symington was recently briefed by our SALT delegation in Vienna he expressed particular interest in the enclosed map depicting the coverage of Soviet ballistic missile and satellite tracking radars. In view of the Senator's desire to study this more thoroughly, I am sending it to you herewith so that it can be made available for the Senator's examination at his convenience. Because of its special sensitivity, however, we ask that it be handled in accordance with existing Joint Committee procedures governing such highly classified material, and that it be made available only to members of the Joint Committee and appropriately cleared members of the Joint Committee staff.

Sincerely,

25X1

John M. Maury  
Legislative Counsel
